CONFERENCE SESSIONS

- ➔ How can the value chain meet the European Commission's Strategy for Plastics?
- ➔ Meet the industry: Collaboration roundtables on crucial challenges across the value chain
 - Analyse challenges in reaching virgin-like quality with recycled polymers
 - How are companies within Asia working towards improving recycling?
 - How can the rest of the value chain support recyclers to improve the recycling stream?
 - Insights into achieving sustainability initiatives within a larger company
- ➔ Evaluating the market for recycled polyolefins
- ➔ Analysing the status of the recycled PET market today
- ➔ Q&A with ICIS
- ➔ Design considerations for packaging to improve recycling rates
- ➔ Innovation Showcase: Opportunities for boosting recycling capacity with feedstock recycling
- ➔ The FMCG Panel: Maintaining brand values while supporting circularity
- ➔ Open Mic Session—finding real solutions within the value chain
- ➔ Closing Keynote: Circularity for polymers

HEAR FROM OUR CUSTOMERS ABOUT THEIR EXPERIENCE

“ The conference brought together stakeholders and experts seeing the topic from various angles - with passion and enthusiasm, yet with pragmatism, understanding the challenge ahead. Great agenda: mix of speeches, panels, interactive discussions plus much time for networking. ”

Economist, **European Investment Bank**

“ Extraordinary opportunity to better understand the recycling market and trends. A top tier conference. ”

Product Development Coordinator, **Galp**

“ Very “relevant” participants (good networking opportunities), good selection of presentations and its structure (less advertisement, more info). Acquire market data about plastic/PE recycling, networking, get infos about status quo of mechanical/chemical recycling esp. in Europe. A good show! ”

Marketing Manager, **Evonik Performance Materials GmbH**

“ One day of quality time and interaction with participants ranging from polymer producers to brand owners. A lot of ground was covered, effectively giving a view of where industry stand on circularity. ”

EMEAF Sustainability Manager Polyethylene, **ExxonMobil**

“ Perfectly well organized, very interesting agenda, great performances. Perfect combination of the most important aspects in the Circularity of Polymers. ”

Senior Process Engineer, **Air Liquide Global E&C Solutions Germany GmbH**

“ Great event for getting update on ongoing in Europe on recycled (legislation, market, Innovation), great also for networking (several shareholders of value-chain and authority decision makers represented), interesting presentations by ICIS and others. ”

Director Global Commodities / Advanced Purchasing, **Electrolux**

“ Good overview starting with challenges (Brussels and pledge) showing initiatives and opportunities to find solutions within a cooperating value chain. Interesting mix of participants - presenters plus participants - providing a comprehensive picture from a legal (Brussels) to a brand owner view perspective. ”

Vice-President, Polyolefins Sales Europe, **Lyondellbasell**
