

OMICRON Conference on Electrical Substation Maintenance

May 5–6, 2020

Figueira da Foz, Portugal

Invitation

OMICRON is an international company providing innovative solutions for primary and secondary testing combining innovation, leading edge technology and creative software solutions.

During this 2-day conference OMICRON will give you an overview on our solutions for substations maintenance testing. Presentations will be combined with practical demos. All presentations will be held in English.

The seminar is free of charge, including lunch and therefore registration is vital. The registration form is attached for your convenience.

We would welcome the chance to talk with you personally at our seminar when hopefully we can answer any questions you may have regarding our broad product and service portfolio.

If you are aware of any of your colleagues who are likely to have an interest in our test equipment, please feel free to duplicate the registration form.

However, please be aware that places are limited and early registration is advised to avoid disappointment.

My colleagues and I very much look forward to meeting you!

OMICRON Technologies España

Boris Battle
Area Sales Manager

Program

During this conference, we will combine theoretical presentations regarding testing and diagnostics of HV assets with practical workshops.

Presentations will cover the following topics:

- > Theory and Diagnostics of Instrument Transformers
- > Comprehensive Diagnostics of Power Transformers
- > Partial Discharge testing on HV cables
- > GIS commissioning and testing

You will then have the opportunity of performing real tests with the focus on:

- > Transformer testing with TESTRANO 600
- > CT and VT calibration with CT Analyzer and VOTANO 100
- > Partial Discharge testing with MONTESTO 200 and MPD

Language

This conference will be held in English.

Target audience

Engineers and technicians from companies active in the electrical power industry which are involved in the manufacturing, control, installation, service and maintenance of substations: electric utilities, service providers, manufacturers of high-voltage assets.

Registration

Spaces are limited so please book your place early to avoid disappointment. Please complete the form and return it by **April 17, 2020** latest to:

For attn.: Ms. Laura Fernández Isidoro
