

# Asbestos Management & Silicosis Face Fit RPE

You are invited to join us for a health & safety review of Asbestos Management and the protective equipment available to prevent Silicosis. We have three knowledgeable speakers who will cover their areas of expertise with a Q & A session to finish the evening.

### **Paul Clarke-Scholes Senior Consultant, Clifford Devlin, & Fergus McCloskey is Managing Director of Asbestos Consultancy Global Environmental**

Delegates will learn techniques to minimize costs associated with asbestos on projects involving refurbishment and demolition. All topics/suggestions have been compiled by experts in all disciplines from surveying to analytical work and removals and is consistent with current best practice pertaining to asbestos management.

### **Adam Moodie General Manager of Breathe Safety**

Attendees will understand the health hazards associated with airborne dust, including silica dust and asbestos, as well as an appreciation of other respiratory hazards. They will understand how respiratory protective equipment (RPE) protects against these hazards, and why face fit testing is a requirement for close fitting RPE. It will cover the common question around facial hair and fit testing as well as looking at options to solve this issue
