

**Amy Cheeseman      Digital Capture Lead Waldeck Consulting Ltd**

Amy leads Waldeck's Digital Capture delivery across the business, effectively and efficiently collaborating with clients and project teams alike to ensure all UAV and terrestrial survey operations are conducted in-line with regulatory and project based requirements. Amy has over 13 years' experience in the engineering industry, initially specialising in on and offsite manufactured construction solutions for blue-chip clients, including precast, insitu and detailing projects. Since qualifying as a Remotely Piloted Aircraft Systems (RPAS) Operator, Amy has several years' experience in undertaking digital capture over a broad range of industries and is responsible for the management and deployment of digital capture solutions in the largest of regulated industries such as Nuclear. Experienced in deploying both terrestrial and UAV based capture technology, Amy regularly utilises varied digital surveying techniques including 3D laser scanning, Photogrammetry and virtual tours.
