

Zealand Pharma.

Transforming metabolic health so millions can live without limits

Danske Bank Nordic Summit – Winter Seminar 2026
November 26, 2026

Forward-looking statements

This presentation contains “forward-looking statements”, as that term is defined in the Private Securities Litigation Reform Act of 1995 in the United States, as amended, even though no longer listed in the United States this is used as a definition to provide Zealand Pharma’s expectations or forecasts of future events regarding the research, development and commercialization of pharmaceutical products, the timing of the company’s pre-clinical and clinical trials and the reporting of data therefrom and the company’s significant events and potential catalysts in 2026 and financial guidance for 2026. These forward-looking statements may be identified by words such as “aim,” “anticipate,” “believe,” “could,” “estimate,” “expect,” “forecast,” “goal,” “intend,” “may,” “plan,” “possible,” “potential,” “will,” “would” and other words and terms of similar meaning. You should not place undue reliance on these statements, or the scientific data presented.

The audience and readers of this presentation are cautioned not to rely on these forward-looking statements. Such forward-looking statements are subject to risks, uncertainties and inaccurate assumptions, which may cause actual results to differ materially from expectations set forth herein and may cause any or all of such forward-looking statements to be incorrect, and which include, but are not limited to, unexpected costs or delays in clinical trials and other development activities due to adverse safety events, patient recruitment or otherwise; unexpected concerns that may arise from additional data, analysis or results obtained during clinical trials; our ability to successfully market both new and existing products; changes in reimbursement rules and governmental laws and related interpretation thereof; government-mandated or market-driven price decreases for our products; introduction of competing products; production problems at third party manufacturers; dependency on third parties, for instance contract research or development organizations; unexpected growth in costs and expenses; our ability to effect the strategic reorganization of our businesses in the manner planned; failure to protect and enforce our data, intellectual property and other proprietary rights and uncertainties relating to intellectual property claims and challenges; regulatory authorities may require additional information or further studies, or may reject, fail to approve or may delay approval of our drug candidates or expansion of product labeling; failure to obtain regulatory approvals in other jurisdictions; exposure to product liability and other claims; interest rate and currency exchange rate fluctuations; unexpected contract breaches or terminations; inflationary pressures on the global economy; and political uncertainty.

If any or all of such forward-looking statements prove to be incorrect, our actual results could differ materially and adversely from those anticipated or implied by such statements. The foregoing sets forth many, but not all, of the factors that could cause actual results to differ from our expectations in any forward-looking statement. All such forward-looking statements speak only as of the date of this presentation and are based on information available to Zealand Pharma as of the date of this presentation. We do not undertake to update any of these forward-looking statements to reflect events or circumstances that occur after the date hereof unless required by law.

Information concerning pharmaceuticals (including compounds under development) contained within this material is not intended as advertising or medical advice.

Defining progress across the pipeline while building the platform for next-generation medicine creation

NON-EXHAUSTIVE

Update since Q2

Petrelintide[a] (amylin analog)

- ✓ **Results from Ph2 ZUPREME-1**
- ✓ **Results from Ph2 ZUPREME-2**
- ✓ **Initiation of Phase 3 program**
- ✓ **Initiation of Ph2 with petrelintide/enicepatide (CT-388)**

Survodutide[b] (GCGR/GLP-1R)

- ✓ **Results from Ph3 obesity trials**
  - ✓ SYNCHRONIZE™-1
  - ✓ SYNCHRONIZE™-2
  - ✓ SYNCHRONIZE™-CVOT
  - ✓ SYNCHRONIZE™-MASLD

Building the pipeline of the future

- ✓ **ZP9830 (Kv1.3)**
  Results from Ph1a SAD and MAD, and clinical advancement
- ✓ **Progress pre-clinical programs at accelerated speed**
- ✓ **Establish Cambridge research site**
- ✓ **Partnerships to evolve and fuel platform**

Executing on rare disease programs

- ☐ **Dasiglucagon for CHI:**
  U.S. regulatory submission
- ✓ **Glepaglutide for SBS:**
  Progression of Ph3 EASE-5 trial

[a]Zealand Pharma has a collaboration and license agreement with Roche for petrelintide, including co-development and co-commercialization in the U.S. and Europe.
[b]Survodutide is licensed to Boehringer Ingelheim from Zealand Pharma, with Boehringer solely responsible for development and commercialization globally.
CGCR=glucagon receptor; GLP-1R=glucagon-like peptide-1 receptor; CVOT=cardiovascular outcomes trial; MASLD=metabolic dysfunction-associated steatotic liver disease; SAD=single ascending dose; MAD=multiple ascending dose; CHI=congenital hyperinsulinism; SBS=short bowel syndrome.

Strategic investments add new modalities to proven peptide expertise

Dec 2025

Peptide-based company

Copenhagen
HQ / R&D Hub

25+ years of metabolic health R&D

>10 candidates in the clinic

2 products on the market

MODALITIES

- **Peptides**
- Small molecules
- Biologics
- Conjugates

Nov 2026

Multi-modality metabolic health company

Copenhagen
HQ / R&D Hub

Cambridge, MA
R&D Hub, opened Sep 2026

STRATEGIC INVESTMENTS

OTR Therapeutics
- ✓ *Oral small molecules*

Generate:Biomedicines
- ✓ *Biologics*
- ✓ *Conjugates*

MODALITIES

- **Peptides**
- **Small molecules**
- **Biologics**
- **Conjugates**

Now
Multi-modality platform in place

Next
Multiple Phase 1 starts

2030
10+ clinical programs (Metabolic Frontier 2030)

Clinical pipeline to deliver 5+ launches by 2030

[a]Investigational compounds whose safety and efficacy have not been evaluated or approved by the U.S. Food and Drug Administration (FDA) or any other regulatory authority;[b]Zealand Pharma has a collaboration and license agreement with Roche for petrelintide, including co-development and co-commercialization in the U.S. and Europe; [c]Survodutide is licensed to Boehringer Ingelheim from Zealand Pharma, with Boehringer solely responsible for development and commercialization globally; [d]The European Commission has granted marketing authorization for Zeydovio™ (glepaglutide) for the treatment of adults with short bowel syndrome.
GCGR=glucagon receptor; GIP=gastric inhibitory polypeptide; GLP-1R=glucagon-like peptide-1 receptor; GLP-2R=glucagon-like peptide-2 receptor; MASH=metabolic dysfunction-associated steatohepatitis; SC=subcutaneous; T2D=type 2 diabetes.

Petrelintide: the ideal first choice for chronic weight management: easy to start and easy to stay on

Phase 2: double-digit weight loss with favorable tolerability

ZUPREME-1[1]

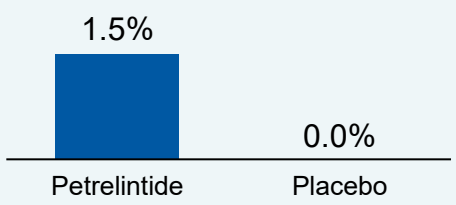

OW/OB without T2D

N=493 | 42 weeks

up to **10.7%**

mean weight loss at week 42

Discontinuation due to GI AEs

Nearly 100% of participants on petrelintide lost weight

ZUPREME-2[2]

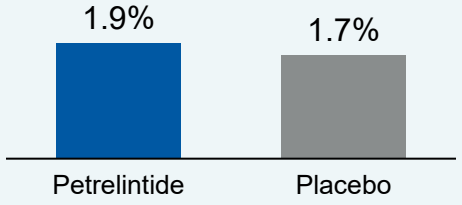

OW/OB + T2D

N=220 | 28 weeks

up to **9.2%**

mean weight loss at week 28

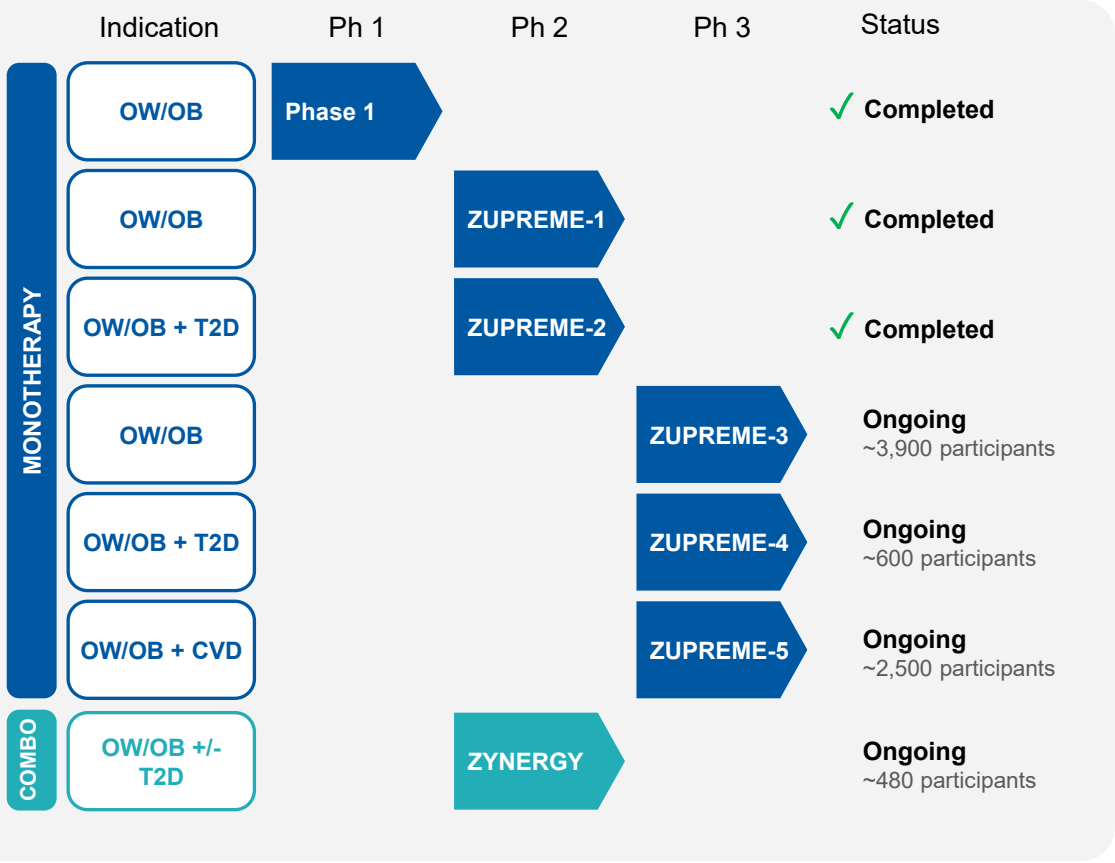

Discontinuation due to GI AEs

HbA1c: up to −0.65% vs +0.23% on placebo

Tolerability profile largely comparable to placebo

Petrelintide clinical development plan

Zealand Pharma has a collaboration and license agreement with Roche for petrelintide, including co-development and co-commercialization in the U.S. and Europe.

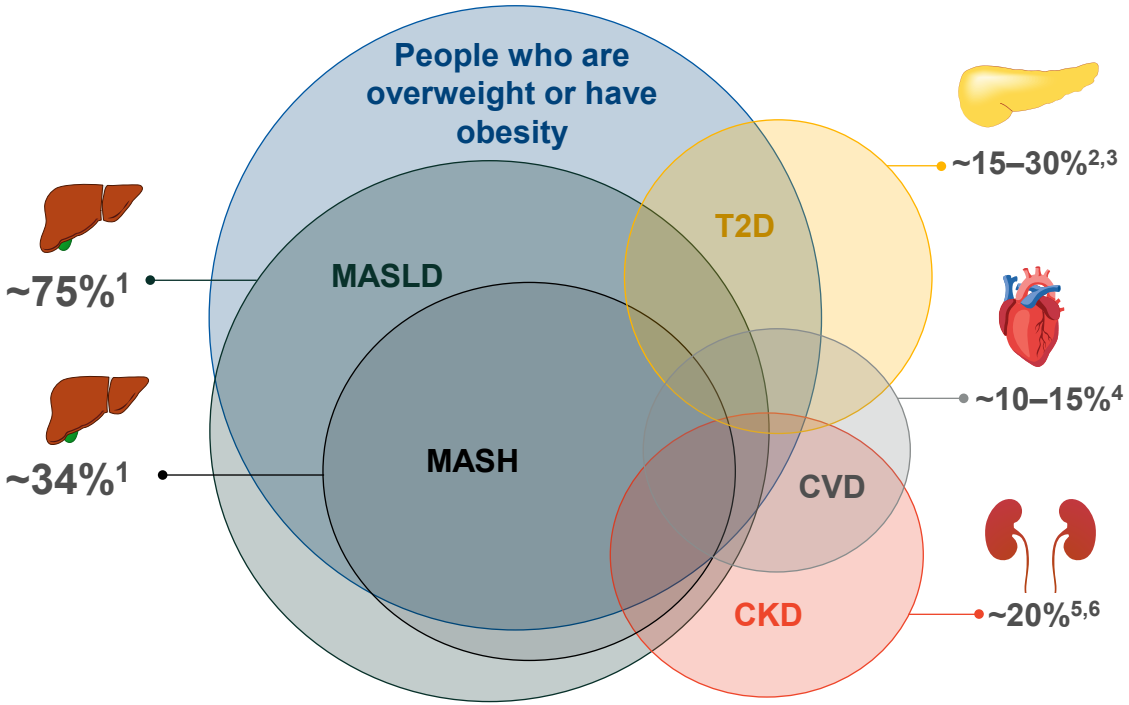

Sources: [1]Garvey et. Al. Petrelintide, a human amylin analogue for the treatment of obesity (ZUPREME-1): a randomised, double-blind, placebo-controlled, phase 2 trial. Lancet Diabetes Endocrinal 2026. https://doi.org/10.1016/S2213-8587(26)00213-5; [2]Zealand Pharma Company Announcement No. 54/2026

OW/OB=overweight or obesity; T2D=type 2 diabetes; CVD=cardiovascular disease

Survodutide: strong metabolic profile reinforced in Phase 3, with targeted fat loss + muscle preservation

Global regulatory submissions in obesity and LIVERAGE (MASH) data in 2027

Obesity is a complex chronic disease with interconnected health consequences

SYNCHRONIZE™ showed survodutide's potential to target underlying metabolic drivers and address complex needs[7-10]

✓ Overweight or obesity **without T2D**[7]
SYNCHRONIZE™-1
76 weeks

16.6% weight loss vs 3.2% placebo
34% visceral fat reduction, **63%** liver fat reduction, **10%** muscle mass loss

✓ Overweight or obesity **+ T2D**[8]
SYNCHRONIZE™-2
76 weeks

13.1% weight loss vs 3.1% placebo
Meaningful improvements in glycemic control

✓ Overweight or obesity **+ MASLD**[9]
SYNCHRONIZE™-MASLD
48 weeks

6/10 achieved liver fat normalization
Clinically meaningful weight reduction (12.2%)

✓ Overweight or obesity **+ CVD or CKD**[10]
SYNCHRONIZE™-CVOT

0.89 HR *5P-MACE (CI: 0.67-1.18)*
0.84 HR *3P-MACE (CI: 0.60-1.18)*
First GCGR/GLP-1R dual agonist to demonstrate favorable CV safety profile

[a]Survodutide is licensed to Boehringer Ingelheim from Zealand Pharma, with Boehringer solely responsible for development and commercialization globally.

NEJM 2026. DOI: 10.1056/NEJMoa2607219; [9]Nature Medicine 2026. https://doi.org/10.1038/s41591-026-04479-3. [10]Zealand Pharma Company Announcement No. 55/2026.

CKD=chronic kidney disease; CV=cardiovascular; CVD=cardiovascular disease; MASH=metabolic dysfunction-associated steatohepatitis; MASLD=metabolic dysfunction-associated steatotic liver disease; T2D=type 2 diabetes; HR=hazard ratio; CVOT=cardiovascular outcomes trial; GCGR=glucagon; GLP-1R=glucagon-like peptide-1 receptor; CI=confidence interval

Zeydovio® (glepaglutide) approved in Europe

First major advance in SBS treatment in Europe in over a decade

Simplified administration and strong efficacy in Phase 3

First and only ready-to-use GLP-2 if approved

Twice weekly administration with autoinjector

66% achieved clinical response[a] vs 38.9% placebo[1]

Clinical efficacy was observed in patients with stoma and colon-in-continuity

14% weaned off parenteral support vs 0% placebo[1]

EU: EC granted Marketing Authorization

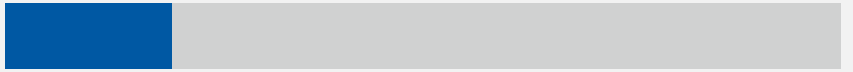

US: EASE-5 Phase 3 trial ongoing to support NDA

Lucrative commercial opportunity

>USD 1 billion

global teduglutide (Gattex®/Revestive®) sales[3,4]

Estimated U.S. SBS-IF patients: ~7,500

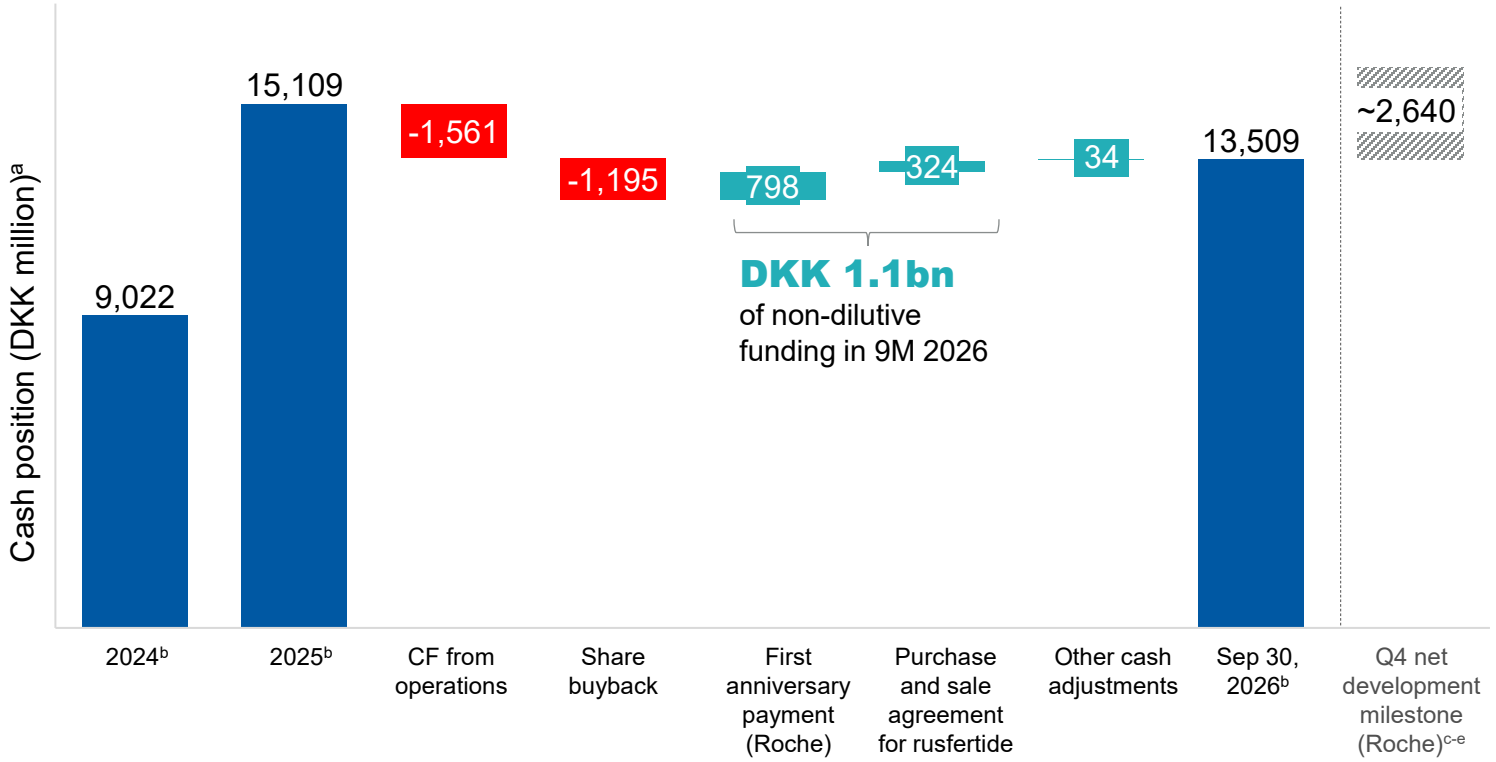

~1,500 (~20%) on Gattex®[5]; ~80% not on therapy

Gattex®	Glepaglutide
Daily dosing	**Twice-weekly dosing**
Vial and syringe, multi-step reconstitution[5]	Ready-to-use autoinjector

Actively engaging in partnership discussions for global commercialization

[a]ZEYDOVIO® is a registered trademark of Zealand Pharma in certain jurisdictions; [b]Clinical response defined at least 20% reduction in weekly PS volume
SBS=short bowel syndrome; EC=european commission; NDA=new drug application; IF=intestinal failure; GLP-2=glucagon-like peptide-2
Sources:[1]Jeppesen et. al. Glepaglutide a Long-Acting Glucagon-like Peptide-2 Analogue, Reduces Parenteral Support in Patients With Short Bowel Syndrome: A Phase 3 Randomized Controlled Trial. Gastroenterology, 2025; 168, 701-713.e6; [2]Zealand Pharma Press Release No. 16/2026; [3]Takeda Annual Report FY 2025; [4]Takeda Quarterly Financial Report Q2 2026 [5]Zealand Pharma estimate based on US Gattex sales and net price estimate; [5]https://www.gattex.com/resources-and-support.

Strong balance sheet enabling investments into future growth opportunities

Executing on key strategic priorities and more

1. Maximize the value of petrelintide
- ✓ *Mono: Phase 2 finished; Phase 3 initiated*
- ✓ *Combo: Phase 2 ZYNERGY trial initiated*

2. Invest significantly in early-stage research pipeline
- ✓ *Cambridge research site opened; Copenhagen expanding*

3. Inorganic investments to enhance R&D capabilities
- ✓ *Collaborations to drive AI-enabled drug discovery, access oral small molecules and proteins*
- ✓ *BD activities to expand modalities beyond peptides*

4. USD 200 million share buy-back program completed

[a]Cash position includes cash, cash equivalents and marketable securities; [b]EIB loan Tranches B and C (EUR 20 million each) are excluded from this chart. The two tranches are subject to pre-specified milestones being met; [c]Zealand Pharma will receive USD 575 million in development milestones from Roche in Q4 2026, partly offset by USD 175 million payment for the contribution of enicepatide (CT-388) in the petrelintide/enicepatide combination; [d]Pro forma financial figures are subject to uncertainties including, inter alia, exchange rate fluctuations; [e]Based on assumed foreign exchange rate: DKK 6.6 = USD $1.
AI=artificial intelligence; BD=business development; FDC=fixed-dose combination; R&D=research and collaboration

On a clear path to sustainable value creation

Becoming a metabolic health champion

Metabolic Frontier 2030

5	launches by 2030
10+	clinical programs
#1	idea-to-clinic cycle times

Building on Partnerships

- Milestones & royalties
- Leading metabolic health pipeline
- Commercial buildout

Boehringer Ingelheim

Roche

Generate:Biomedicines

OTR Therapeutics

Metabolic health champion

- Bringing medicines to millions
- Sustainable revenue and earnings growth
- Partner of choice in metabolic health
