

DIT Global Aid & Development Directory 2022

UK Government

Foreword and contact details

This Global Aid & Development Directory profiles some of the best UK suppliers to the humanitarian and development sector.

It has been produced by the Department for International Trade (DIT), the UK Government body in charge of promoting UK trade abroad and attracting foreign investment to the UK economy. As part of the Aid Funded Business team, our role is to assist UK companies in winning contracts with the UN family and other international aid organisations.

The UK is recognised as a reputable supplier and for many year has featured in the Top 10 League Table. In 2021, the UN procured \$726 millions worth of good and services from the UK.

As the world faces an unprecedented series of health, conflict and humanitarian crisis, international organisations work tirelessly on development and relief assistance programmes. The private sector plays an active part in providing relevant and innovative solutions that can save lives and help the ones in need.

We hope that this directory will help you identify new solutions and suppliers to fulfil your mission.

Ancora Solutions Ltd

William GIMSON

Managing Director

☎ +44 (0) 7801 734 469

✉ William@ancora-solutions.com

🌐 www.ancora-solutions.com

Company Profile:

We work collaboratively with partners, Customers and End Users in order to deliver mission defining and impactful solutions. We support humanitarian operations by providing:

- Compact, next generation bonding devices providing instantly available, stable and secure broadband data connectivity for individuals, deployed teams or headquarters locations. The routers bond multiple 3G, 4G, LTE or 5G connections together to form a broadband connection. Designed for simple, rapid deployment, the system requires no user configuration or training.
- An ultra-low-power long-range encrypted tactical mesh network that operates at 868 MHz, 915 MHz or 923 MHz. This network provides a communications range of up to 3km (peer-to-peer) or 10km (with hops). The body-worn device allows a group of people to securely text and share geolocation without cell service, Wi-Fi or satellite. It also automatically monitors the activity and location of devices, so team members can check on each other and conduct remote wellness checks.

Mark DAVIES

Vice President International Sales

☎ +44 (0) 7940 359 998

✉ mark.davies@arianemedicalsystems.com

🌐 www.arianemedicalsystems.com/

Company Profile:

Ariane Medical Systems Ltd developed their X-ray Brachytherapy System for the management of lower rectal tumours, known as Papillon Technique in 2008. Papillon brachytherapy treats rectal cancers in inoperable, elderly patients or those with associated comorbidities; as well as operable patients interested in organ preservation and overall QoL.

Ariane's new Papillon+™ X-Ray Brachytherapy system has taken the High-Dose Rate, Low-Energy methodology of the rectal treatment and applied it to superficial skin cancers and IORT applications including breast IORT.

It's a mobile, battery powered radiotherapy treatment system which needs nominal shielding ideal for offering adjuvant treatment in developing countries.

Concrete Canvas Ltd

Darren HUGHES

International Business Development Manager

☎ +44 (0) 7799 711 473

✉ darren.hughes@concretecanvas.com

🌐 www.concretecanvas.com

🐦 @_ConcreteCanvas

Company Profile:

Concrete Canvas Ltd's core material technology enables the supply of unique construction solutions that are extremely fast, easy to install and environmentally friendly. The company prides itself on innovation, quality and responsiveness to our customers' needs.

Concrete Canvas GCCM material is a flexible, concrete filled geosynthetic which provides a thin and durable concrete layer when hydrated. Typically, 10-times faster to install than conventional concrete solutions; essentially, it is Concrete on a Roll™. CC is a low mass, lower carbon technology which uses up to 95% less material than conventional solutions. A single pallet of CC can cover the same area as two 17T concrete mixer trucks for many applications.

The primary markets for Concrete Canvas Ltd are in the civil infrastructure (road, rail, irrigation), mining and petrochemical sectors where CC is used for erosion control applications such as channel lining, slope protection and bund lining. The company has grown rapidly since 2005 and has sold its products to over 80 countries around the world.

🐦 @junemedical

Company Profile:

JUNE Medical is an award-winning medical device company with offices in the UK, USA, and Sweden.

The company supplies selected quality products from leading manufacturers, and develops its own medical instruments, including the Galaxy II® self-retaining retractor – an extraordinary tool featuring the world’s first-ever light attachment, Galaxy II® LUX Connect.

Galaxy II® is a lightweight self-retaining retractor, designed to hold back tissues to give surgeons clear access to the surgical site. The retractor replaces the need for assistants during surgeries.

The versatility that Galaxy II® offers means it can be used in many scenarios. Our donations to the fistula foundation sees it assist in gynaecological procedures in Africa, and most recently donations have been used in emergency open surgeries in the Ukraine.

The JUNE Medical team is skilled, knowledgeable, and work hard to make things happen. We have built our excellent reputation by listening, reacting, and providing solutions. JUNE Medical has seen exceptional growth since it began in 2013 and working alongside its partners, we are now able to offer our products across the globe.

Angela ELLIOTT

Head of UK Office

☎ +44 (0) 2070 960 446

✉ angela.elliott@mccgrouplondon.com

🌐 www.mccgrouplondon.com

Company Profile:

MCC Group is a Medical Consultancy and Construction Group with over 30 years' experience supporting governmental and international organisations globally. MCC specialises in the planning, design and execution of turnkey and tailor-made hospital projects with a particular focus on modular, mobile and field hospitals. MCC Group is a founder member of UKIHMA, which is a strategic partner of UK Healthcare, the Department of Health and NHS England.

- Our mobile field hospitals have served the United Nations in Sudan and on the Ivory coast. MCC has planned, designed and executed a fully equipped 160 person camp for the United Nations in Africa including all necessary supporting facilities (i.e. water tanks, power generation, water treatment plants, fuel tanks, service buildings etc.), showing our abilities to provide a multidisciplinary approach to the construction industry in remote areas as well as major city centres.
- Peru chose MCC Group to assist in their fight against Covid-19. Ten MCC mobile clinics have been located different regions of Peru. Rwanda used our 100-bed mobile field hospital as a pandemic isolation centre and capacity expansion for Nyamata hospital.

🐦 @MattWal79512221

Company Profile:

As a sustainable Advanced Materials producer, Versarien offers a portfolio of graphene enhanced applications and products.

For example, using its trademarked Cementene product, Versarien already produces graphene enhanced concrete shelters/homes, which can be 3D printed on-site; and within literally just a few hours. These shelters/homes are extremely cost effective and also CO2 emission efficient.

✉ s.larkin@vestey.com

🌐 www.vesteyfoods.com

Company Profile:

Vestey Foods is a fourth-generation family-owned business that has supplied a wide range of food rations to large Government and Non-Governmental Organisations for over 16 years, for delivery worldwide. The rations are suitable for all climates and can be stored at ambient temperatures to accommodate the dietary needs for individuals to be self-sufficient for up to 24 hours or for groups of up to 10 people with access to basic cooking facilities. Our rations are custom made to meet our customers' specific requirements and our operation is supported by highly experienced inhouse Technical, Quality Assurance, Procurement, Logistics, and customer Service teams.

🐦 @Walkgrove

Company Profile:

Walkgrove is a training consultancy, owned by Swedish plc, Semcon. Walkgrove develops bespoke training solutions globally in the not for profit, public and private sectors. Circa 80% of its revenue is from online bespoke development and it offers a choice of configurable learning management systems. Creativity is underpinned by a robust project management and design and development approach that is consultative and collaborative and which often involves blending components to form a training solution that appeals to all audiences. Walkgrove also offers a comprehensive catalogue of off-the-shelf e-learning which can be viewed on its website..

**Water Powered
Technologies**

We are Water!

Company Profile:

Water Powered Technologies design and manufacture simple water powered pumping systems that require no fuel or electricity. Using only a flowing water source the Papa Pump and large scale Venturo Pump can deliver water to where it is required for irrigation, livestock, communities and commercial uses, as well as for micro-hydro generation.

Award winning and in use in over 50 countries, the Papa Pump has been designed for ease of use, maintenance and longevity, with the first Papa Pumps still working 24/7 25 years after installation.

🐦 @Yanco_IISs

Company Profile:

Yanco manufacture innovative, sustainable, highly affordable mosquito control and insecticidal products for global markets.

Our low cost, transfluthrin Insecticide Paper kills mosquitoes within several minutes and is suitable for mass distribution. It is simple, portable, low cost, has no disposal issues and is environmentally friendly, empowers the user who can carry with them and use indoors anywhere, and protects all in the room whenever used, not just those under a bed net.

It is suitable as a new tool to “fill the gap” and address indoor and daytime biting anywhere, as a first line of defence against mosquitoes in Humanitarian Aid acute phase emergencies, and as part of an integrated approach with existing tools in Development Aid programmes.

The product is subject to a global patent by Bayer Cropscience.
