Northern Dimension Future Forum on Environment

Brussels, 19 November 2018

www.ndep.org

NDEP multi-donor fund

- Fund set up in 2002 thanks to EU Northern Dimension policy
- Two windows:
 - Nuclear Safety projects – 100% grant funded
 - Non nuclear projects – loans and grants
- Primary objective: improve the environment in the Baltic and Barents Seas Region of the Northern Dimension Area

Over 30 projects in Russia and Belarus

NDEP Support Fund 2018

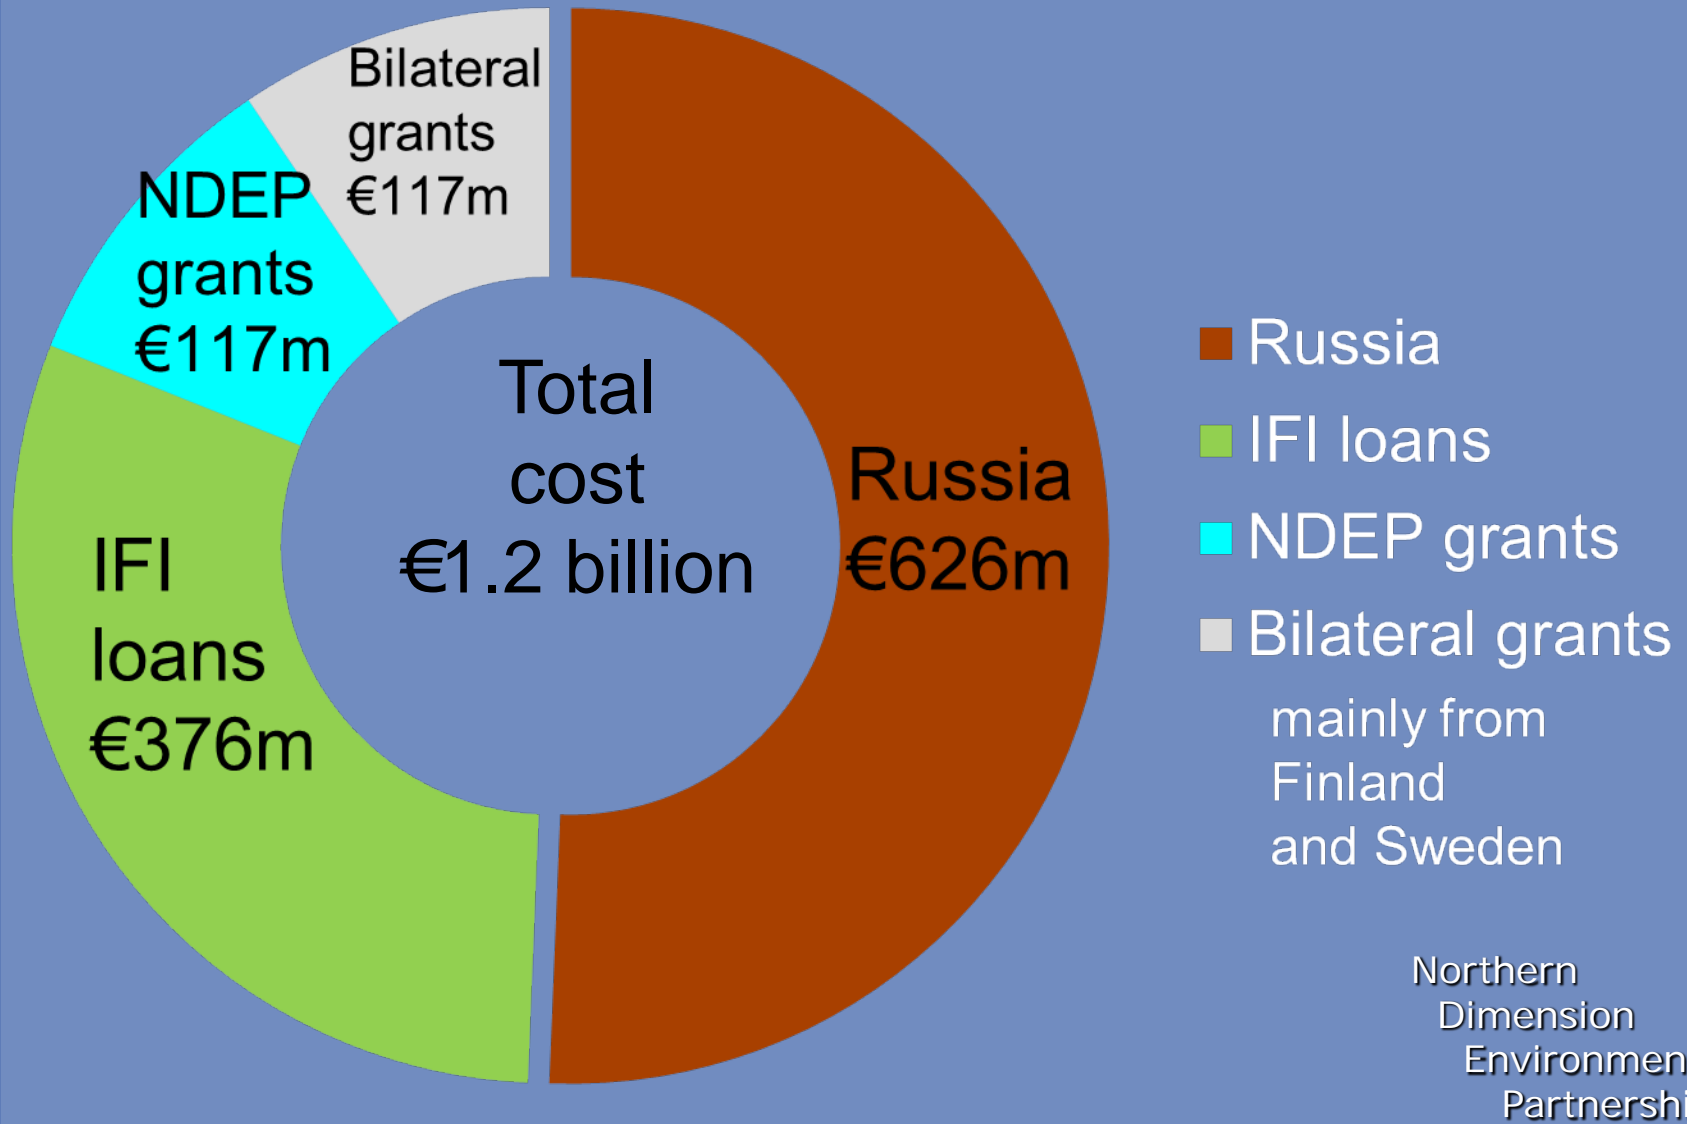

Environmental		Nuclear	
€44m	European Union		€40m
€60m	Russia		
	France		€40m
	Canada		€20m
€16m	Germany		€10m
€26.3m	Sweden		
€19m	Finland		€2m
	UK		€30m
€10m	Denmark		€1m
€4.4m	Norway		€17.7m
	Netherlands		€10m
	Belgium		€0.5m
€2m	Belarus		
€181.7m		€171.2m	
€352.9m

NDEP projects in Russia (2002- 2018)

St Petersburg Neva Programme - completed Oct 2018

- Reductions: P 539 t/p.a. and N 2,339 t/p.a.
- NWWTP capacity: 1,200,000 cubic meter of sewage/day
- NDEP grant €24 million + Russian funds: €562 million

Kaliningrad WWTP - completed June 2017

Reductions: P: 120 t/p.a. and N: 300 t/p.a.

Plant capacity: 150,000 cubic meter of sewage/day

NDEP grant €10 million + Russian funds €56 million

NDEP wastewater treatment projects in Belarus

- Construction of new wastewater treatment facilities on-going in: Brest, Grodno, Vitebsk to be completed in 2019/2020
- NDEP grants € 6m

Environmental leverage of NDEP grants

- Objective is to reach full compliance with HELCOM standards for phosphorous and nitrogen content in the treated wastewater
- The NDEP projects are cost-effective as reducing one tonne of phosphorus load through NDEP in Russia and Belarus is around 20% of the cost that Finland, Sweden or Germany would have paid to reduce the same amounts in their own country.

Current activities through NEFCO

- Projects to combat Black Carbon in north west Russia (small boiler houses, district heating)
- Krasnyi Bor hazardous waste
- Wastewater treatment in Gatchina, Vyborg, Petrozavodsk

Working towards a cleaner
and safer environment in
northern Europe.

- Water and wastewater treatment
- Agricultural and solid waste management
- Energy Efficiency
- Nuclear Safety

What we do

The NDEP is a result-focused initiative to calls from the international community, in particular Russia and Belarus, for concerted action to tackle the most pressing environmental problems in the Northern Dimension Area.
