

Green Genius

A renewable energy company
that makes a difference

Where we operate

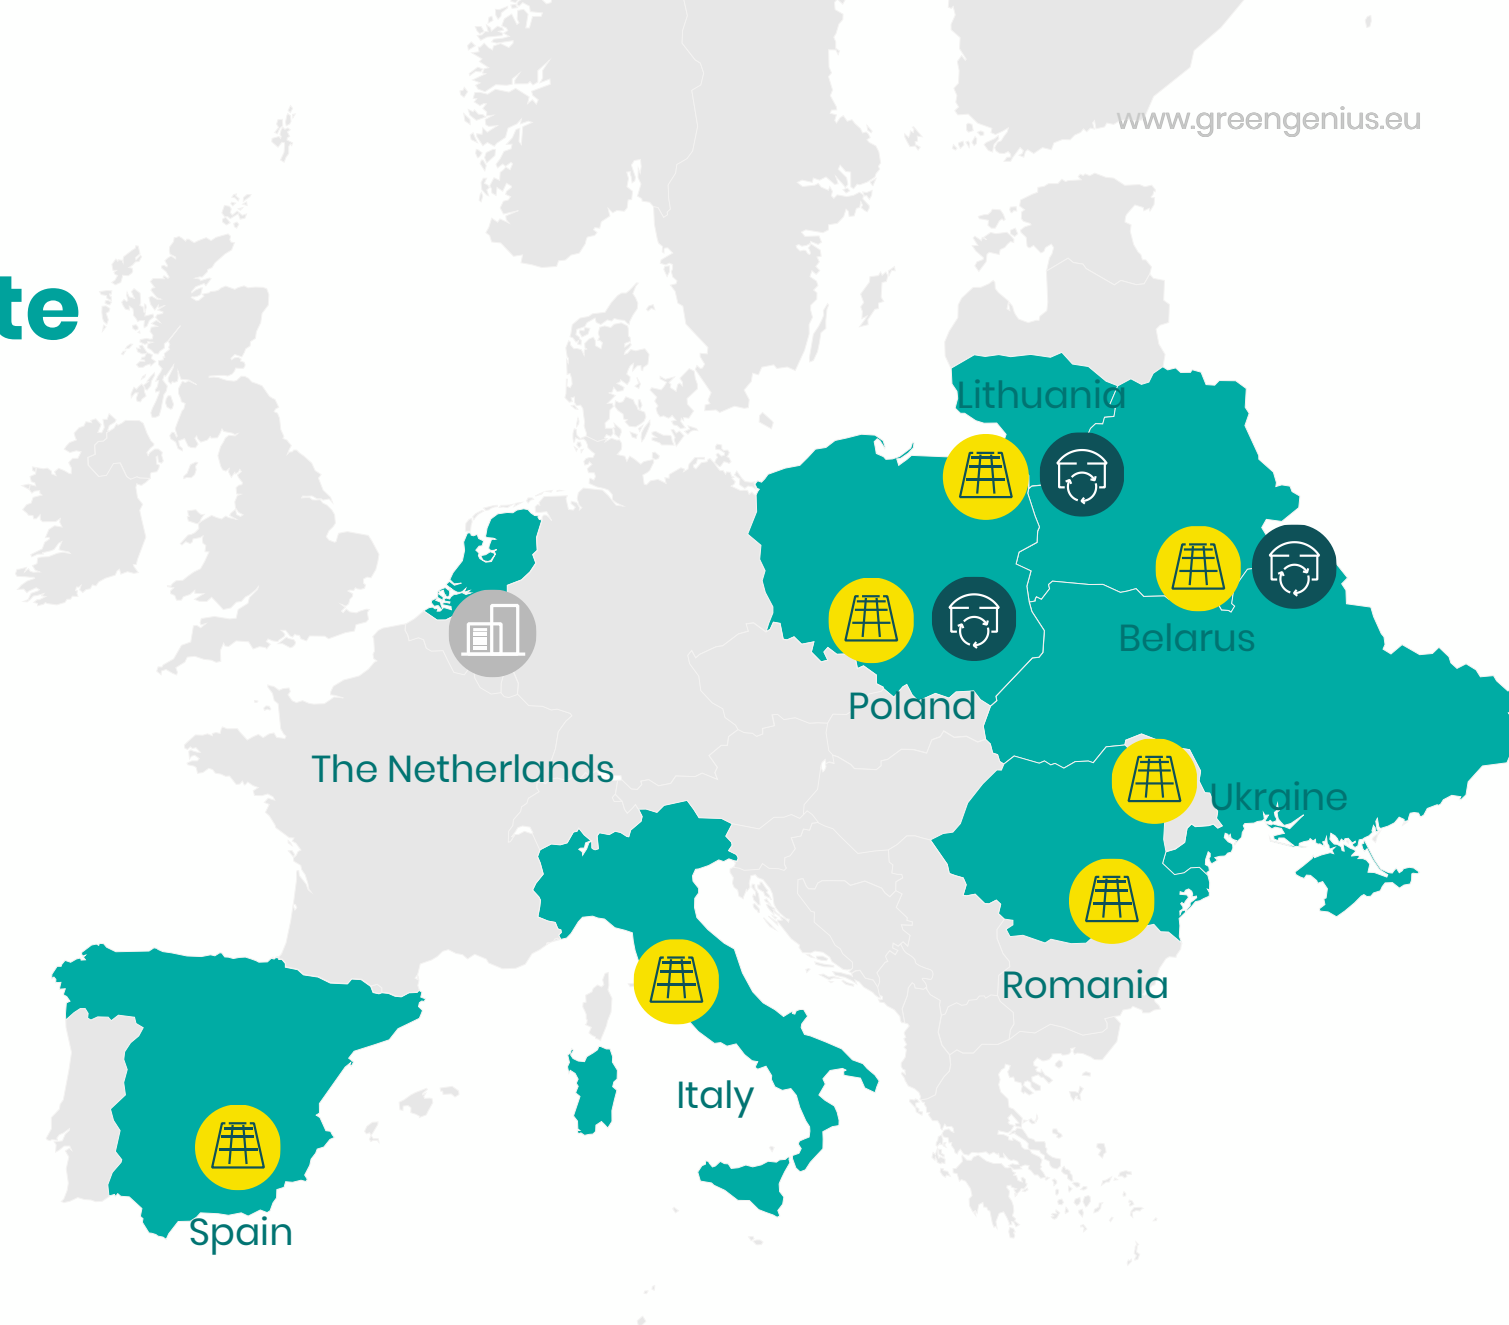

Solar power projects

over **150 MW**
across all markets

Biogas projects

over **20 MW**
across all markets

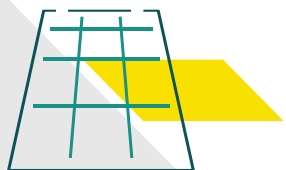

Trusted by international partners

Investment experience in Belarus

Solar power

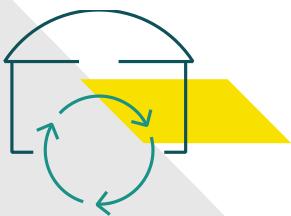

Installed capacity: 5.7 MW

Investment: 9.56 million euros.

Half of the funds required for the project were provided by through local banks, and the remainder was invested by the Modus Group.

Investment year: 2016

Financial incentive: fixed tariff, investment agreement.

Biogas

Installed capacity:

10 MW – 8 power plants in various regions across Belarus.

Investment year: 2018–2019

Financial incentive: renewable energy auctions, where the feed-in-tariff is calculated by multiplying the fixed coefficient and the industrial consumers' price of electricity.

Experience in Belarus

Excessive
bureaucracy

Long
processes

Public
authorities'
compliance
with the laws

Absence of
intentional
obstruction

- ✓ After investment, electricity is purchased by the law.
- ✓ Green Genius have been suspended the investments in Belarus since 2020 due to the country's de-prioritization of renewables, and uncertainty over Covid-19.

Investment experience in Ukraine

Solar business

13.5 MW

Investment: 11M EUR

Investment year:
2019–2020

Financial incentive:
fixed tariff

33 MW

Investment: 30M EUR

Investment year:
2019–2020

In partnership with
EBRD

Financial incentive:
fixed tariff

- In 2020, the feed-in-tariff was reduced via retrospective regulatory change.
- The payments' delays are experienced since 2020.
- Investments have been suspended since 2020, due to the country's investment climate and significantly increased regulatory risks.
- Foreign investors have filed for arbitration due to damages.

Conclusions

It is vital that governments adhere to the rules and obligations that they create, especially when they legislate and invite foreign investors.
