

Harry, with over 20 years experience in environmental management, is a resident of Qatar since 2012 and is the Environment & Sustainability Manager for Jacobs in Qatar. He led the authoring of the early CEMPs for the first of the World Cup Stadia, the Environmental Management section of the Qatar National Highways Design Manual (QHDM) and the Sustainability Strategy for a major educational campus in Qatar.

He has been instrumental in successfully pioneering the use of CEEQUAL on major civil infrastructure projects in Qatar, and the drafting of the forthcoming revision of QCS in addition to supervising construction of several of the Expressways Programs.

A Fellow of IEMA, Harry is the founding Chairperson of IEMA in Qatar and the Middle East. Together with the IEMA Steering Group in Qatar, he has led engagement with a range of stakeholders - and organized multiple successful networking-seminars on different topics from Climate Change to Circular Economy.
